<-- This is what the data URL will receive

What does the Data URL receive:

Pay Products					NEW PAY PRODUCT	
Title	Price	Link	QR	Active	Actions	
Test product	\$10.00 USD	https://go2fete.com/pay/1		N		
Individual Pass (Virtual Blocks)	\$13.00 USD	https://go2fete.com/pay/5		Y		

< previous next >

After creating a product you will see a product url (Link) and a QR Code (QR), these can be used on your website to direct users to checkout that product. Products can be deleted or edited. On the edit screen you have the option to make the product active or not.

Sales

Here you can find all the orders made for your various products. The list represents all sales of your various products. This screen also shows the fees charged to you and your earnings. The figure next to the Withdraws button how's the total amount of earnings (sales after fees).

How to Withdraw: You can click on the withdraw button to request withdrawal of your earnings.

Request Widthdraw						Requested: \$0.00	REQUEST
Request	Order	Product	Fee	Earning	Created		
Cancel Request	9	Test product	\$0.50	\$9.50	8/11/21, 1:02 AM		
<input type="checkbox"/>	16	Test product	\$1.00	\$19.00	8/12/21, 2:00 AM		

< previous next >

Page 1 of 1, showing 2 record(s) out of 2 total

Here you can request payment by selecting the checkbox under the Request column associated with the order. You will notice as you select, the Requested amount is updated. Once you have selected all the requested amount you can click the Request button and your request for payment will be logged. At any time you can always cancel a request for a withdrawal. However once processed you can no longer cancel.

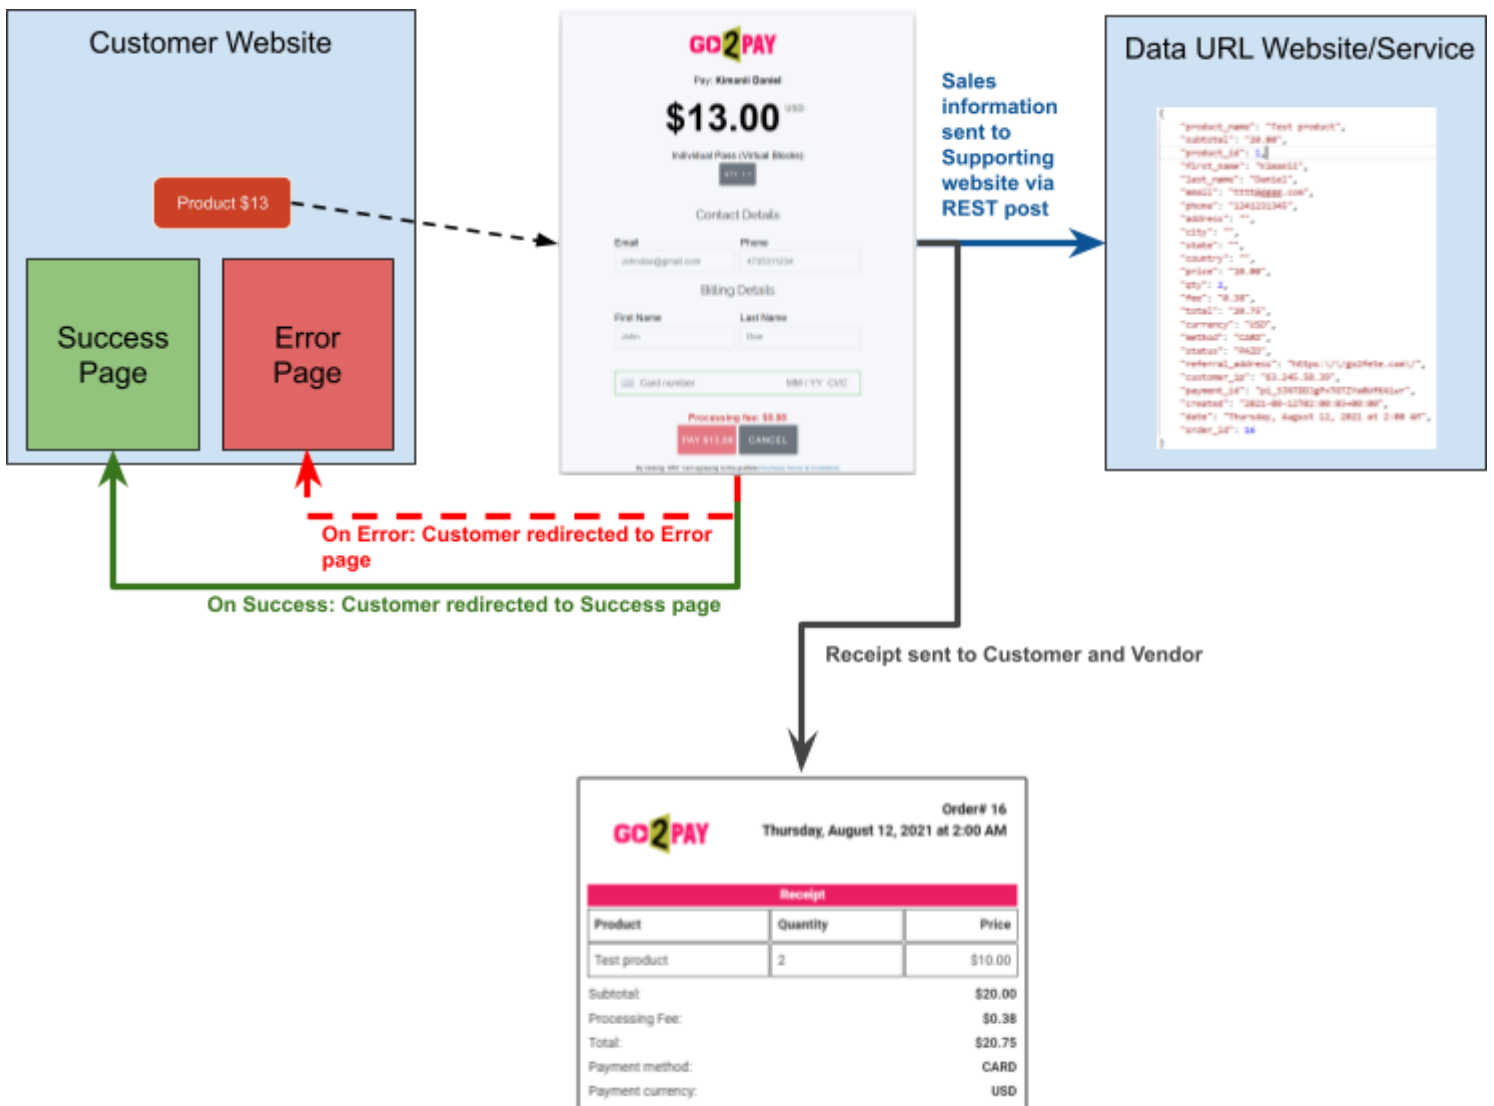

Banks

Use banks to add your withdrawal bank accounts. Go2Pay will transfer any requested withdrawals to the bank account you choose. On the add and edit form you can add any necessary details for your accounts

Technical Details:

Below is the architecture and flow of the payment process.

1. The user clicks a link or button on the customer's website that would send the customer to the Go2Pay payment screen. This screen accepts payment.
2. If the user cancels or there's any error in the payment, they're redirected to the vendor's cancel or error url for that product.
3. If the payment is successful:
 - a. The customer is sent to the success page
 - b. The sales information is sent to the data url
 - c. A receipt is sent to both the vendor and customer
